

Globi's Astronaut School

Globi takes off, and kids between seven and twelve are invited to join him. The outdoor trail offers many exciting experiments and playful lessons about space travel, physics and Mars. Together with a student guide from ETH Zurich, the kids get to explore the Hönggerberg Campus and carry out experiments at seven stations. They learn what energy is and how you can successfully enter an orbit to land on another planet. The highlight: a real rocket launch.

The trail takes place outdoors from spring to autumn in all weathers conditions and without accompanying persons (except teachers). Suitable clothing is requested.

Additional didactic material to deepen the topics in class will be provided to teachers.

For individual kids

Available public dates are bookable [online](#).

90 minutes: CHF 10 per child

Payment is made directly at the time of booking by credit card or TWINT.
